

How to embed a VStream video into Blackboard content page

Using Blackboard mashup tool to play VStream video in context with other course content.

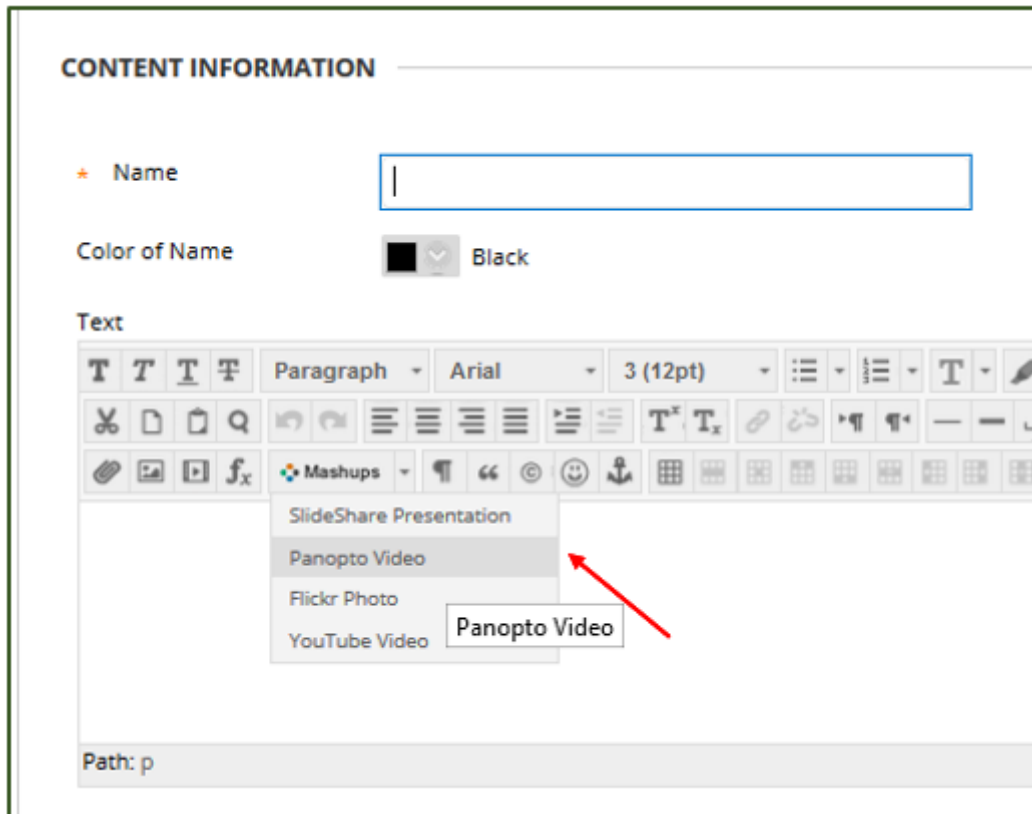

Add a Blackboard item

1. To add VStream video onto a Blackboard page start by adding a Blackboard content 'Item'.

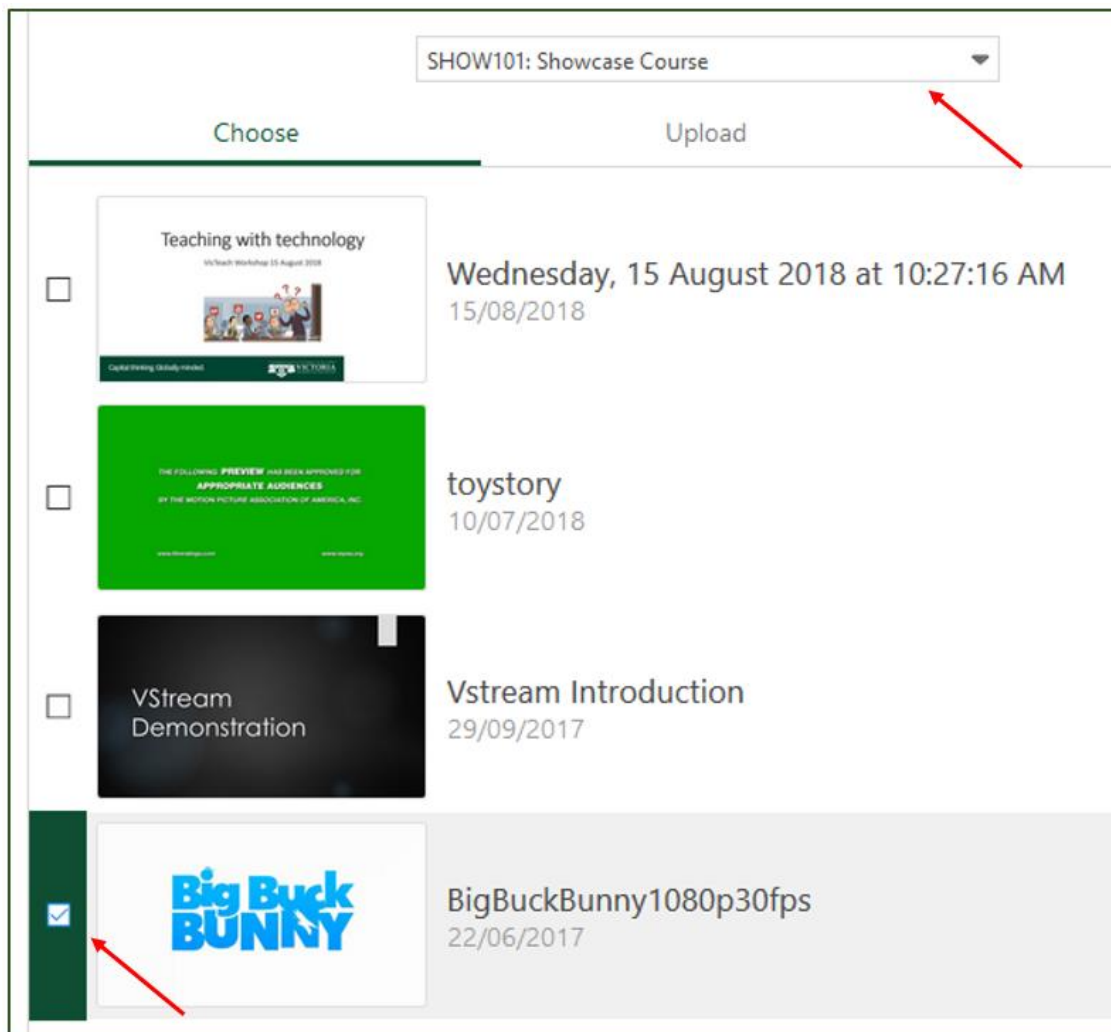

2. Enter the name of the video or topic.

3. In the text editor box select mashups, and Panopto Video as the option.

4. This will open another window showing you the videos available to you from this course folder or other course folders you have rights to use the content from.
5. Select the course you want or leave as current Blackboard course. Select which video you want to embed with the mashup tool. Select this by clicking the checkbox to left of the thumbnail image.

6. Once selected insert videos button at bottom right.

7. This will add a yellow box into the text editor preview. Complete other settings for Blackboard item as required:

- a. Attachments
- b. Permission to view
- c. Tracking views
- d. Date restrictions.

Click submit at bottom right.

The item then looks like this on the page. And students can play it directly from here.

The screenshot shows a video player interface. At the top left, there is a document icon and the text "Big Buck Bunny" with a small lock icon. Below this, the video title "BigBuckBunny1080p30fps" is displayed. The main video area shows the "Big Buck BUNNY" title in large, blue, stylized letters. A play button is centered over the text. In the bottom left corner of the video area, there is a logo for "VICTORIA UNIVERSITY WELLINGTON" with the Māori text "TE WHARE WĀNANGA O TE ŪPOKO O TE IKA A MĀUI" below it. Below the video area, it says "Powered by Panopto". In the bottom right corner of the video area, there are download and share icons. Below the video player, there is a text box that says "You can add extra text to explain to the student what they should pay attention to or think about when watching this video."
